# REMARKS

Claim 1 has been amended to include the subject matter of claim 2. Pursuant to the examiner's comments in the advisory action, the claim now specifies exactly how the global method lookup table relates to the smaller and distributed versions of the global method lookup table. Specifically, the smaller and distributed versions of the global method lookup table include only those methods whose codes are allocated within the particular local memory sub-region.

For all the reasons set forth before, and in view of the examiner's comments in the last office action, the application should now be in condition for allowance.

Respectfully submitted,

Date: <u>April 4, 2008</u>
